

## Use case : Post a Job

The screenshots illustrate the 'Post a Job' use case on the 'Helpies' website. The first screenshot shows the homepage with a blue arrow pointing to the 'Post a Job' button. The second screenshot shows the 'Create Job' form with a blue arrow pointing to the 'Post Job' button. The third screenshot shows the 'List of Jobs' page with a blue arrow pointing to the 'eye' icon next to a job listing.

The user chooses "Post a job"

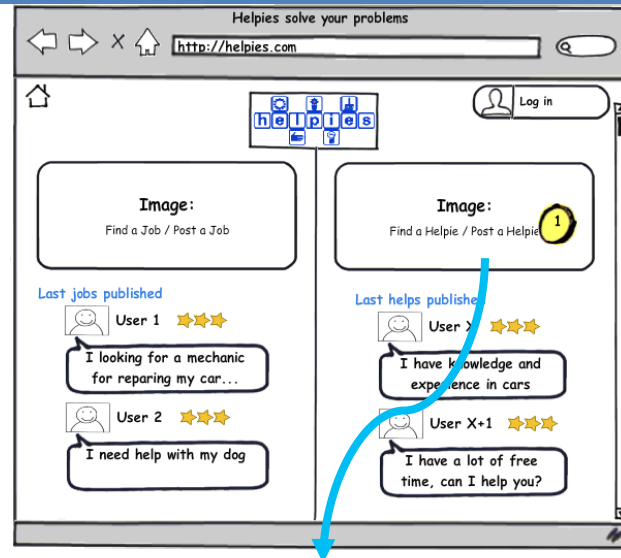

Fill up all fields related to the ad, description and some characteristics about experience and **what he needs**.

Rating field is filled automatically.

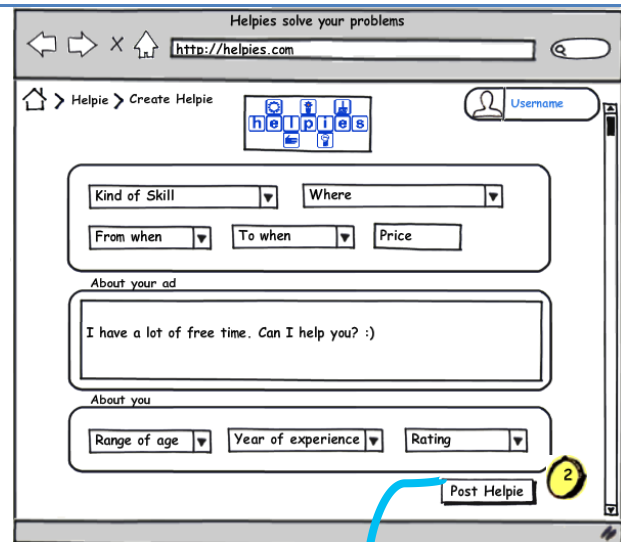

Finally, When the user posts the job he will see a list with the new ad.

The user can review his ad clicking on the eye icon.

## Use case: Post a Helpie

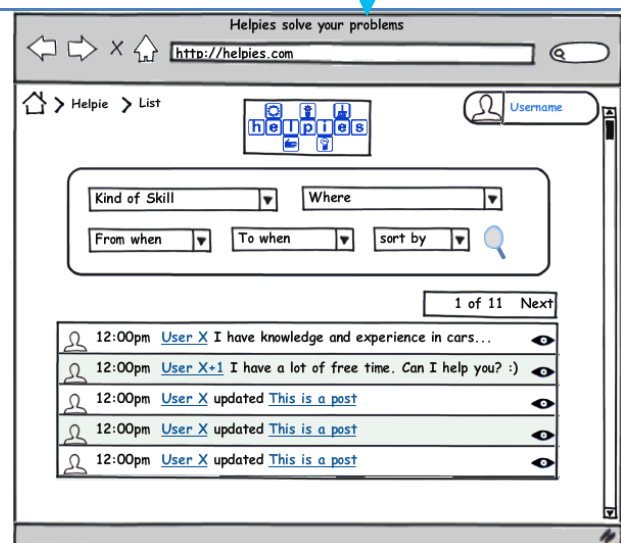

The user chooses “Post a helpie”

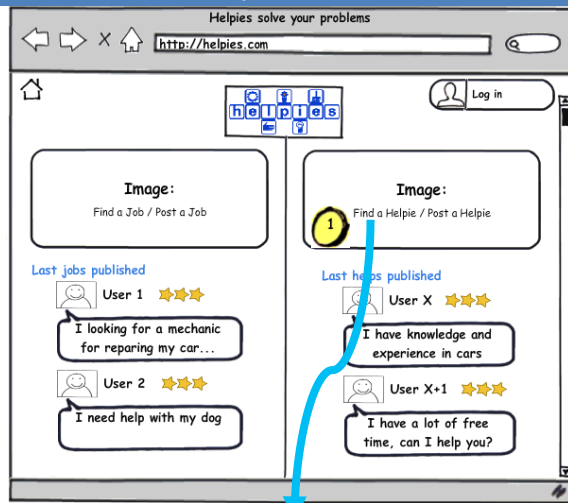

Fill up all fields related to ad, description and some characteristics about experience and **what he can offer to other user.**
